ACEE

Advisory Committee on Energy Efficiency Status

Strategic Group 1

AC/11/2013 (2013-03-15)

Further to its review process of Strategic Groups, the SMB, at its February 2013 meeting, made the following decisions:

SMB Decision 146/6 - Report from SG 1, *Energy Efficiency and Renewable Energies*

The SMB expressed appreciation and thanks to SG 1 for its report (SMB/4951/R) and recommendations.

SMB agreed to the setting-up of an Advisory Committee on Energy Efficiency (ACEE) with the scope given in document SMB/4951/R, as modified relative to horizontal issues and to make a call for members and nominations for a chairman by 2013-04-15. Terminology questions will be referred to TC 1 for their consultation.

SMB Decision 146/7 - Disbanding of SG 1, *Energy Efficiency and Renewable Energies*

SMB thanks SG 1 and Bernhard Thies for their work and decided to disband SG 1 as from 2013-06-30.

ACEE membership

Guide presents a **List of EE Aspects** that may need to be considered by TCs

List serves as a checklist for TCs, which EEAs they could include in their publication

Format: Guide118

Organization

How TCs cooperate on EE
 Describes the exchanged information between parts of a system
Harmonize approaches of TCs in IEC through the development of basic EE, group EE and EE publications

Format: Guide 119

Overview

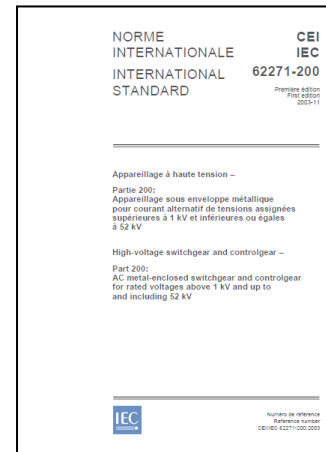

Standard	Title	Project	Energy Efficiency Aspect				Organization		
			Calculating KPI	Labeling of EE	Benchmarking	Energy Performance	Managing Energy Efficiency	Basic Publication	Group Publication
IEC/TC 2 "Rotating machinery"									
IEC 60034-2-1:2007-09	Rotating electrical machines - Part 2-1: Standard methods for determining losses and efficiency from tests (excluding machines for traction vehicles)	Ed. 2	x	x	x				x
IEC 60034-2-2:2010-03	Rotating electrical machines - Part 2-2: Specific methods for determining separate losses of large machines from tests - Supplement to IEC 60034-2-1	none		x		x		x	
IEC/TR 60034-2-3)	Rotating electrical machines - Part 2-3: Specific test methods for determining losses and efficiency of converter-fed AC induction motors	Ed. 1	x	x	x		x		
IEC 60034-30:2008-10	Rotating electrical machines - Part 30: Efficiency classes of single-speed, three-phase, cage-induction motors (IE-code)	Ed. 2		x					x
IEC/TS 60034-31:2010-04	Rotating electrical machines - Part 31: Selection of energy-efficient motors including variable speed applications - Application guide	none				x		x	

Systematic Overview

List of standards related to EE with additional information about EE aspects covered

Format: List of standards

Generic

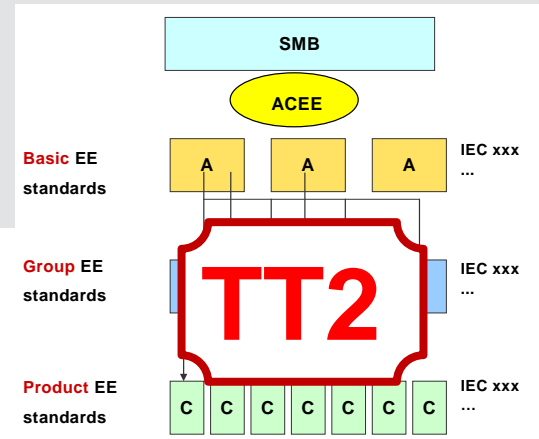

Best practices

Derive the things that work for all domains per EE aspect

Format: Open – (Annex to a Guide)

How it fits together

- Include comment resolution – editorial cleanup – 2 month – end June
- French translation – 2 month – end August
- Circulation as CDV – 3 month – end November
- Discussion in Paris
- Finish!

- **Circulation of CDVs**
 - **Guide 118** *Energy Efficiency Aspects inclusion in electrotechnical standards*
 - **Guide 119** *Preparation of the Energy Efficiency (EE) Publications and the use of Basic EE publications and Group EE publications*
- **Next meeting** *06.-08. December 2016 in Paris*
- **Publication of Guides expected end of 2017**

Standards are tools to support implementation of EE

Standards are tools to support implementation of EE

Energy efficiency aspect categories	Energy efficiency aspect
Define energy efficiency	Define terminology
	Define system boundaries (including the scope for energy efficiency)
	Define EE KPIs (energy efficiency key performance indicators)
	Define energy baseline
	Define driving parameters (adjustment factors, static factors)
	Define reference applications
	Define reference load profiles
Measure energy efficiency	Define reference control strategies
	Define test methods
	Define measurements methods
	Define measurements plans
	Define calculation methods
Assess energy efficiency	Define classes
	Energy audits
	Benchmarking methods
Improve energy efficiency	Energy efficiency investment evaluation
	Energy management system
	Design criteria guidelines
	Application guidelines
	Best practices
	Losses reduction (Standby losses)
Enable energy efficiency	Interoperability
	Communication
	Standardised data format
	Qualification of energy efficiency services
	Measurement infrastructure

Annex C (informative)

Inclusion of energy efficiency aspects in IEC publications

Annex C complements 5.3 by giving some examples of energy efficiency aspects inclusion in publications. For this reason, Table 1 in 5.3 has been reproduced hereunder; a third column has been added, listing examples of publications that address one or more energy efficiency aspects presented in 5.3.

Table C.1 – Energy efficiency aspects and examples of their inclusion in publications

Energy efficiency aspect categories	Energy efficiency aspect	Examples of inclusion in publications
Define energy efficiency	Define terminology	<ul style="list-style-type: none"> ISO/IEC 13273-1 – Energy efficiency and renewable energy sources – Common international terminology – Part 1: Energy Efficiency
	Define system boundaries	<ul style="list-style-type: none"> IEC 61800-9-1 Ed.1: Adjustable speed electrical power drive systems - Part 9-1: Energy efficiency of power drive systems, motor starters, power electronics and their driven applications - General requirements for setting energy efficiency standards for power driven equipment using the Extended Product Approach (EPA) and semi analytic model (SAM) IEC TR 62837 – Energy efficiency through automation systems
	Define EE KPIs (energy efficiency key performance indicators)	<ul style="list-style-type: none"> IEC 60364-8-1 : Low-voltage electrical installations – Part 8-1: Energy efficiency IEC 60034-30-1 – Rotating electrical machines – Part 30-1: Efficiency classes of line operated AC motors (IE-code) IEC 60034-30-2 – Rotating electrical machines – Part 30-2: Efficiency classes of variable speed AC motors (IE-code) IEC/TS 60076-20 Ed. 1.0: Power transformers - Part 20: Energy efficiency ISO/IEC 30134 (series) Information Technology – Data Centres – Key Performance Indicators IEC 61800-9-2 Ed.1: Adjustable speed electrical power drive systems - Part 9-2: Ecodesign for power drive systems, motor starters, power electronics & their driven applications - Energy efficiency indicators for power drive systems and motor starters IEC TR 62837 – Energy efficiency through automation systems ISO 22400-2, Automation systems and integration – Key performance indicators for manufacturing operations management – Part 2: Definitions and descriptions
	Define energy baseline	<ul style="list-style-type: none"> ISO 50006:2016 – Energy management systems – Measuring energy performance using energy baselines (EnB) and energy performance indicators (EnPI) – General principles and guidance

Examples

ANNEX C

Energy efficiency aspect categories	Energy efficiency aspect	Examples of inclusion in publications
	Define driving parameters (adjustment factors, static factors)	<ul style="list-style-type: none"> • (to be completed)
	Define reference applications	<ul style="list-style-type: none"> • IEC 60458 – Clothes washing machines for household use – Methods for measuring the performance
	Define reference load profiles	<ul style="list-style-type: none"> • (to be completed)
	Define reference control strategies	<ul style="list-style-type: none"> • EN 15232 – Energy performance of buildings – Impact of Building Automation, Controls and Building Management* • IEC TR 62837 – Energy efficiency through automation system
Measure energy efficiency	Define test methods	<ul style="list-style-type: none"> • IEC 60034-2-1 – Rotating electrical machines – Part 2-1: Standard methods for determining losses and efficiency from tests (excluding machines for traction vehicles)
	Define measurements methods	<ul style="list-style-type: none"> • IEC 62442-1 – Energy Efficiency of electrical lighting equipment-Ballasts for fluorescent lamps Part 1: Method of measurement to determine energy consumption of ballast-lamp circuits • IEC 62301 – Household electrical appliances – Measurement of standby power • IEC 62018 – Power consumption of information technology equipment – Measurement methods • IEC 60034-2-1: Rotating electrical machines - Part 2-1: Standard methods for determining losses and efficiency from tests (excluding machines for traction vehicles)
	Define measurements plans	<ul style="list-style-type: none"> • IEC 62888 – Railway applications – Energy measurement on board trains
	Define calculation methods	<ul style="list-style-type: none"> • EN 15193: Energy performance of buildings – Energy requirements for lighting
	Define classes	<ul style="list-style-type: none"> • IEC 60034-30-1 – Rotating electrical machines – Part 30-1: Efficiency classes of line operated AC motors (IE-code) • IEC 60034-30-2 – Rotating electrical machines – Part 30-2: Efficiency classes of variable speed AC motors (IE-code) • EN 50598-2 – Ecodesign for power drive systems, motor starters, power electronics and their driven applications – Part 2: Energy efficiency indicators for power drive systems and motor starters • EN 50588-1 – Medium power transformers 50 Hz, with highest voltage for equipment not exceeding 36 kV – Part 1: General requirements
Assess energy efficiency	Energy audits	<ul style="list-style-type: none"> • ISO 50002:2014 – Energy audits – Requirements with guidance for use • ISO 11011:2013 – Compressed air – Energy efficiency – Assessment • EN 16247-5:2015 – Energy audits – Part 5: Competence of energy auditors
	Benchmarking methods	<ul style="list-style-type: none"> • EN 16231:2012 – Energy efficiency benchmarking methodology

Examples ANNEX C

Energy efficiency aspect categories	Energy efficiency aspect	Examples of inclusion in publications
	Energy efficiency evaluation	<ul style="list-style-type: none"> ISO 20140-1:2013 – Automation systems and integration – Evaluating energy efficiency and other factors of manufacturing systems that influence the environment – Part 1: Overview and general principles
	Energy efficiency investment evaluation	<ul style="list-style-type: none"> ISO/AWI 20364 – Energy Savings Evaluation – Economics and financial evaluation of energy saving projects
Improve energy efficiency	Energy management system	<ul style="list-style-type: none"> ISO 50001:2011 – Energy management systems – Requirements with guidance for use ISO 50004:2014 – Energy management systems – Guidance for the implementation, maintenance and improvement of an energy management system
	Design criteria guidelines	<ul style="list-style-type: none"> IEC TS 60034-31 – Rotating electrical machines – Part 31: Selection of energy-efficient motors including variable speed applications – Application guide
	Application guidelines	<ul style="list-style-type: none"> ISO 50004:2014 – Energy management systems – Guidance for the implementation, maintenance and improvement of an energy management system IEC 60364-8-1, Low-voltage electrical installations – Part 8-1: Energy efficiency IEC TR 62837 – Energy efficiency through automation system
	Best practices	<ul style="list-style-type: none"> IS 399 Energy Efficient Design Management CLC/prTR 50600-99-1, Information technology – Data centre facilities and infrastructures – Part 99-1: Recommended practices for energy management
	Losses reduction	<ul style="list-style-type: none"> CLC/prTR 50600-99-1, Information technology – Data centre facilities and infrastructures – Part 99-1: Recommended practices for energy management
	(Standby losses)	<ul style="list-style-type: none"> (to be completed)
	Enable energy efficiency	Interoperability
Communication		<ul style="list-style-type: none"> ISO/IEC 15067-3 – Information technology – Home electronic system (HES) application model – Part 3: Model of a demand-response energy management system for HES
Standardised data format		<ul style="list-style-type: none"> (to be completed)
Qualification of energy efficiency services		<ul style="list-style-type: none"> EN 15900:2010 – Energy efficiency services – Definitions and requirements
Measurement infrastructure		<ul style="list-style-type: none"> IEC 62974-1 – Monitoring and measuring systems used for data collection, gathering and analysis
NOTE 1 A single publications could address more than one energy efficiency aspect.		
NOTE 2 Not all energy efficiency aspects eventually addressed by cited publications have been highlighted.		

Further examples e.g. IEC 62301 "Household electrical appliances – Measurement of standby power"
